FISCAL IMPACT STATEMENT

LS 7135

BILL NUMBER: HB 1224

DATE PREPARED: Jan 8, 2002

BILL AMENDED:

SUBJECT: Voting Systems and Voter Registration.

FISCAL ANALYST: Chris Baker

PHONE NUMBER: 232-9851

FUNDS AFFECTED: ☒ **GENERAL**
☒ **DEDICATED**
FEDERAL

IMPACT: State & Local

Summary of Legislation: This bill has the following provisions:

(A) Provides that certain voters whose registration is in question may cast a provisional ballot.

(B) Provides that furnishing all voters of the county with a sample ballot is an expense for which counties may be reimbursed from the Voting Systems Education Fund (VSEF).

(C) Removes language that permits the use of noncompliant voting systems under certain circumstances.

(D) Provides for the use of voting systems that provide a practical and effective means for voters with disabilities to cast ballots in private.

(E) Requires that after December 31, 2004, a voting system must permit a voter to verify the voter's votes before the voter casts the ballot.

Effective Date: July 1, 2002.

Explanation of State Expenditures: (A) This section of the bill would require the Election Division to print and ship provisional ballots for state offices and the President of the United States (in Presidential election years) to county circuit court clerks or the director of the board of elections in registrations (for certain counties). This provision would have an impact. However, the Election Division is already required to print ballots for certain general elections under current law. It is believed the additional expenditure to the Election Division to provide provisional ballots to counties would be absorbed within the Election Division's budget. The Election Division printed approximately 250,000 ballots at \$0.25 per ballot for the 2000 general election (250,000 X \$0.25 = \$62,500). The Election Division would be required to send the provisional ballots by certified mail. Rates for certified mail are as follows: \$2.10 for certification and \$0.34 for first class postage.

If mail weighs more than an ounce, \$0.23 is charged for each additional ounce.

As of January 2, 2002, the Election Division had 13 full-time positions, one vacant (full-time), and one intermittent position.

Penalty Provision: Under the bill, a provisional ballot counter that knowingly causes a vote to be incorrectly taken down for a candidate or public question or makes a false statement, certificate, or return of any sort for that vote commits a Class D felony. Additionally, if a provisional ballot counter knowingly opens or marks a ballot (unless allowable by law) or attempts to know the vote of the voter before a ballot is put in a ballot box, or cast on a voting machine, electronic voting system, or ballot card voting system, the provisional ballot counter commits a Class D felony.

A Class D felony is punishable by a prison term ranging from six months to three years or reduction to Class A misdemeanor depending upon mitigating and aggravating circumstances. The average expenditure to house an adult offender was \$22,131 in FY 2000. Individual facility expenditures ranged from \$16,442 to \$40,312. (This does not include the cost of new construction.) If offenders can be housed in existing facilities with no additional staff, the average cost for medical care, food, and clothing is approximately \$1,825 annually, or \$5 daily, per prisoner. The average length of stay in Department of Correction (DOC) facilities for all Class D felony offenders is approximately ten months.

(B) Under current law (P.L. 239-2001), counties may apply for a grant from the VSEF for the development of programs meant to educate voters in the county. Applications must be sent to the state Budget Agency. The Budget Agency, after review by the state Budget Committee, is required to approve a county's application to receive grant money from the VSEF if the application demonstrates: (1) the county has developed a voter education program on the use of the county's voting system; (2) the Election Commission has approved the program and the county's implementation of the program; (3) that the program will enhance the familiarity, accessibility, ease of use, and public confidence in the county's voting system.

The bill would allow VSEF grants to be used for the furnishing of all voters of the county with sample ballots before an election. The impact of this provision to state expenditures will depend on availability of money in the Fund and approvals of grants made by the Budget Agency (see *Explanation of Local Expenditures*).

Under Public Law 291-2001, the General Assembly appropriated from the Build Indiana Fund \$4 M for local election equipment matching grants and \$5 M for local election and voter registration equipment.

(D) The Election Commission would be required to determine whether a voting system is accessible enough for voters with disabilities to be able to cast a vote in private. The Commission could incorporate the examination of voting systems under this basis in the course of business of a normally scheduled meeting of the Commission.

Explanation of State Revenues: **(A)** *Penalty Provision:* The bill provides for a Class D felony. If additional court cases occur and fines are collected, revenue to both the Common School Fund and the state General Fund would increase. The maximum fine for a Class D felony is \$10,000. Criminal fines are deposited in the Common School Fund. If the case is filed in a circuit, superior, or county court, 70% of the \$120 court fee that is assessed and collected when a guilty verdict is entered would be deposited in the state General Fund. If the case is filed in a city or town court, 55% of the fee would be deposited in the state General Fund.

Explanation of Local Expenditures: **(A)** County election boards and circuit court clerks will see increased

administrative responsibilities relating to the pre-election processing, delivery, and post-election processing of provisional ballots. Specifically, the circuit court clerk will be required to estimate the number of provisional ballots required to vote in the county. Ballots not involving elections for President, Vice President, United States Senator, all state offices, public questions put to the entire state electorate, or retention of judges on the state Supreme Court or Court of Appeals would be required to be printed by the county election board. Cost to produce ballots would vary by county. Each provisional ballot must be signed by the circuit court clerk or their designate.

The bill would also allow the county election board to contract with a state university or college to dispose of the ballots for the purpose of election research.

Penalty Provision: If more defendants are detained in county jails prior to their court hearings, local expenditures for jail operations may increase. The average cost per day is approximately \$44.

(B) The bill gives the option for a county to mail sample ballots to all voters of the county. If this option is exercised by the county, the county may apply for a grant from the VSEF to cover the expenditure of the sample ballots as described above.

Assuming the cost of a sample ballot is \$0.25 per ballot, it is estimated, based upon the number of registered voters in the state, the total cost to print sample ballots to send to every registered voter in every Indiana county would be approximately \$1 M. As of the 2000 general election, the Election Division reported 4,000,809 registered voters in Indiana.

(D) Depending on the ruling of the Election Commission regarding the accessibility of current voting systems, future local purchases of voting systems could be influenced, or existing voting systems that are currently acceptable for use may be ruled as unacceptable.

(E) Currently, only DRE (Direct Recording Electronic) voting systems are confirmed to be able to allow a voter to verify and then change a vote before the electronic ballot is cast. Depending on whether the bill would require all non-DRE (including an optical scan voting system) counties to replace their voting system with DRE, or require that at least one voting machine in the county have the capability to verify votes, the impact to local expenditures could range from \$12 M to \$39.1 M. This estimate was based on approximately 3,727 precincts that as of March 2001 did not employ a DRE voting system. DRE machine cost was provided by vendors at \$3,200 to \$4,450 per unit.

Optical scan voting systems allow a voter to see if he/she over-voted, or (if programmed) under-voted a ballot. However, given no paper ballot is entered initially into a DRE machine, the transfer of an electronic ballot checked by a DRE could prove difficult to transfer to an optical scan or other type of voting system currently approved by the Commission.

Background: Under Public Law 291-2001, the General Assembly appropriated from the Build Indiana Fund \$4 M for local election equipment matching grants and \$5 M for local election and voter registration equipment. Under current law (P.L. 239-2001), the state may provide a 50% match for the purchase, lease, or lease purchase of voting equipment by a county if necessary approval has been attained from the Budget Agency.

Explanation of Local Revenues: **(A)** *Penalty Provision:* If additional court actions occur and a guilty verdict is entered, local governments would receive revenue from the following sources: (1) The county

general fund would receive 27% of the \$120 court fee that is assessed in a court of record. Cities and towns maintaining a law enforcement agency that prosecutes at least 50% of its ordinance violations in a court of record may receive 3% of court fees. (2) A \$3 fee would be assessed and, if collected, would be deposited into the county law enforcement continuing education fund. (3) A \$2 jury fee is assessed and, if collected, would be deposited into the county user fee fund to supplement the compensation of jury members.

State Agencies Affected: Indiana Election Division; Indiana Election Commission; State Budget Agency; Department of Correction.

Local Agencies Affected: Counties, towns, precincts; Trial courts, local law enforcement agencies.
